About Brand Guidelines

The purpose of the guidelines is to create consistent, identifiable branding that can be used across all marketing and creative initiatives. It’s the visual and verbal expression of a brand through elements like its logo, colors, typography, tone of voice, and overall style.

Function

The brand identity serves as a strategic tool that communicates values, builds recognition, and fosters trust with an audience. On top of this all, its key function is to differentiate Predictive from its competitors &create consistency across all touchpoints.

Guide

This document serves as a roadmap for understanding and applying Predictive SCS’ brand identity. Inside, you’ll find clear guidelines on logo usage, typography, color treatments, imagery, and tone. Think of it as both a reference and a toolkit for digital assets, building presentations, or developing new materials, this guide provides the direction needed to keep Predictive’s Branding cohesive.

PREDICTIVE SCS

Using logo

Building a brand identity is key for consumers to identify with and recognize. So, multiple use cases are important to ensure the logo fits into every medium.

Horizontal Use

PREDICTIVE
SCS

Symbol Use

SCS P

The logo system has been designed with flexibility in mind, ensuring it can adapt seamlessly across multiple channels and formats. These three variations serve specific use cases—whether on web platforms, social media assets, or pitch decks, so the brand maintains consistency while remaining visually optimized for each environment.

Color logo

Making sure the logo is the standout when looking at the color variations is key to standing out with unique identifiable branding.

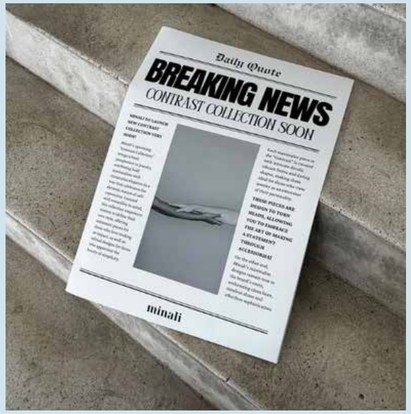
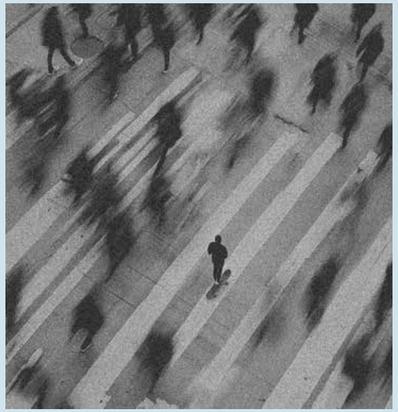
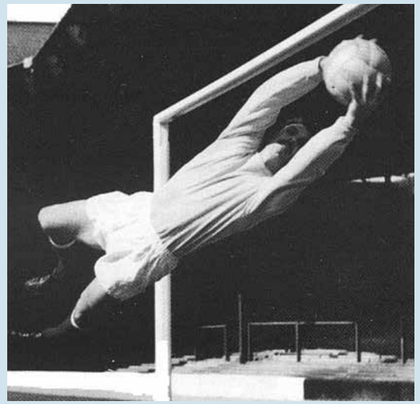
Image Style

Our imagery is designed to embody the intersection of technology and growth. We prioritize clean, socially-native, modern visuals that highlight innovation, bigger picture ideas, visuals that everyone can relate to and forward-focused environments.







Brand Application

Every visual element should work together to express a brand that’s innovative, accessible, and collaborative. The goal is to make Predictive Solutions instantly recognizable while staying approachable to all audiences, from supply chain experts to first-time users.

Our Mission

At Predictive Supply Chain Solutions, our mission is to **eliminate the blind spots that hold businesses back.** We connect fragmented data across finance, sales, product, and operations into a single source of truth. By combining predictive analytics with deep operational expertise, **we empower leaders to understand the “why” behind variances, anticipate challenges before they occur, and make smarter, faster decisions.** Our purpose is to give every business the clarity and control they need to thrive in a world of constant change.

Our Vision

Our vision is to r**edefine how businesses plan and operate.** We aspire to become the trusted operations nerve center for companies worldwide — a platform where data is **no longer siloed, where AI works hand-in-hand with human judgment, and where decisions are made with confidence rather than guesswork.** We envision a future where businesses of all sizes can anticipate shifts, adapt with resilience, and unlock sustainable growth. By building connected intelligence across the value chain, we aim to transform uncertainty into opportunity.

Tone of Voice

Core Personality & Values

- Inquisitive → Always asking “what if?” and encouraging discovery.
- Flexible → Adapts language and tone to different audiences and contexts.
- Innovative → Uses imagination to reframe problems in new, accessible ways.
- Collaborative and purposeful → Engages people with fresh thinking while keeping business outcomes in focus.

Tone Principles & Guidelines

- Lead with Curosity → Start with questions and possibilities, not statements. Curiosity sparks engagement.
- Keep it Collaborative → We are working with people closest to the brand, use inclusive language that makes them feel part of the process.
- Be Clear & Human → Translate complexity into everyday language. Speak like a person, not a textbook.
- Inspire Confidence & Action→ Be optimistic and solution-oriented. Our tone should leave people feeling capable and excited.

Tone of Voice

Writing Style & Mechanics

Vocabulary & Tone

- Prefer plain English over jargon. Translate technical terms into relatable concepts.
- Use active voice and present tense to create immediacy.
- Maintain a curious, friendly, and inclusive tone.

Sentence & Paragraph Style

- Use short to medium-length sentences; keep paragraphs concise.
- Break complex ideas into digestible chunks.
- Use bullets or numbered lists to make instructions or insights scannable.
- Always grammatically correct - unless for a trend.

Examples - The Dos & Don’t Scenarios

Make complex ideas approachable

- Do - “Slide a bar to see the impact on cash flow.”
- Don’t “Our demand forecasting engine calculates inventory turns via advanced algorithms.”

Use collaborative, inclusive language

- Do: “Together, we can simplify the complex and find clarity.”
- Don’t: “The software enables users to model inventory scenarios.”

Lead with questions to spark curiosity

- Do: “What if you could test buying more stock without risk?”
- Don’t “Adjust your purchase orders.”

Include and empower the audience

- Do: “You know your business—let’s explore the solutions together.”
- Don’t: “The platform provides predictive insights for your business.”
